## PRODUCT INSTRUCTIONS

Product Code : **2351A**                      Product Description : **DIY HEAT PAD**

### INSTRUCTIONS

- The DIY Heat Pad is manufactured from heavy density glass weave fibre.
- The DIY Heat Pad will withstand temperatures up to 600°C and provides protection in most soldering and brazing work.
- If the pad should start to glow at the point the flame is striking the fabric, then the pad should be moved slightly to enable unheated sections of the pad to come into contact with the flame.
- The use of two pads is recommended, where the heat source is expected to be intense.
- The DIY Heat Pad does not present the health hazards associated with asbestos.
