PRODUCT INSTRUCTIONS

Product Code: 358J	Product Description: BOX RING IMMERSION HEATER SPANNER
Product Code: 359M	Product Description: CRANKED IMMERSION HEATER SPANNER
Product Code: 360Q	Product Description: FLAT IMMERSION HEATER SPANNER
Product Code: 361T	Product Description: BOX RING IMMERSION HEATER SPANNER

WARNING

- Applying excessive force may distort or damage the cylinder.

INSTRUCTIONS

- Turn off electricity supply to Immersion Heater and disconnect wiring from Immersion Heater.
- Turn off water supply to Immersion tank and drain out some of the water in the cylinder.
- Position Tommy Bar to it's extended position for maximum leverage. Hold the box spanner securely in position and turn in an anti-clockwise direction and remove immersion heater.
- Clean the thread on the inside of the cylinder boss making sure to remove any residue.

- Apply PTFE tape or approved sealant to the thread of the new immersion heater to ensure a water tight seal. Screw immersion heater carefully into cylinder boss avoiding cross threading.
- Tighten in a clockwise direction.
- Before re-wiring the Immersion Heater turn on water supply and check for leaks.
- Ensure that rewiring instructions supplied with new immersion heater are followed. Ensure that immersion heater is properly earthed before turning on electricity supply.
