

PATENTED FORMULA

MORE ADVANCED • MORE VALUE • MORE RESULTS

Septic System Treatment contains eight strains of bacteria that digest proteins, fats, oils, grease, paper, starches, surfactants and chemicals from household cleaners to keep your septic system active and running smoothly.

Directions for use: Pour half container into toilet and flush. Then pour the second half into the toilet and flush twice. Apply one container every other month.

Instrucciones de uso: Vierta la mitad del recipiente en el inodoro y tire de la cadena. Después vierta la segunda mitad en el inodoro y tire de la cadena dos veces. Aplique un recipiente cada dos meses.

Non-flammable

CAUTION: Harmful if taken internally

Keep out of reach of children

SEPTIC SYSTEM TREATMENT is a very concentrated bacterial additive that contains our latest patented ROETECH bacteria in a specially buffered formula. It is based on our ROETECH cultures used in industrial and commercial wastewater systems and septic tanks worldwide. Regular use will assure that your septic system is functioning at its peak for trouble free and longer service.

"Keeping septic systems healthy since 1959."
