

You won't get caught short...

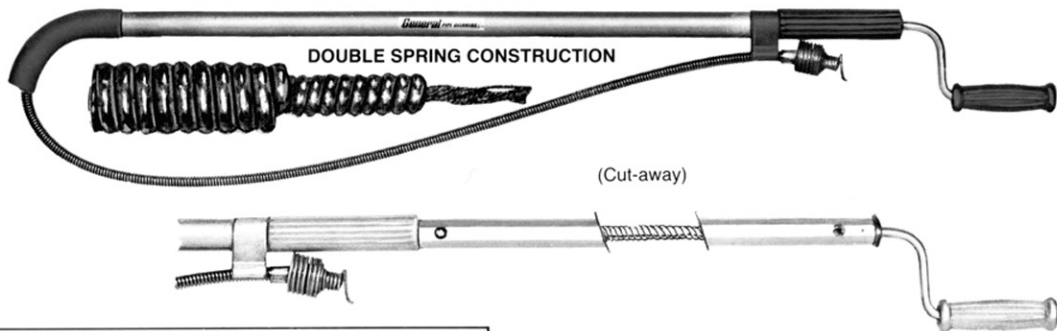

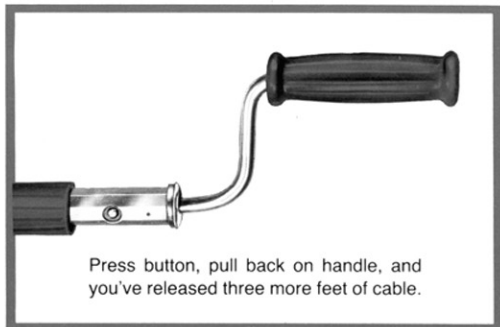

with General's *Teletube*[®] Closet Auger

Here's a tool that makes conventional six foot closet augers obsolete. It works as smoothly as our standard three footers but has an additional three feet telescoped into a guide tube until you need it. After you've worked the first three feet into a bowl, you can go three feet farther simply by pressing a button and pulling back the crank handle.

A bonus with the Teletube Closet Auger is its extra-rugged construction. The outer tube is a big 1 1/8" in diameter, and the guide tube is even tougher than the steel rod we use in our 3FL Closet Augers. Yet the tool weighs only a pound and a half more than our three foot model.

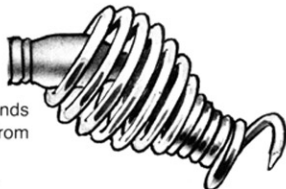

Other features include a vinyl bowl guard, vinyl grip handle, die cast aluminum turning handle, and plastic clip for attaching snake.

You get the same *unlimited* one year warranty with the Teletube that you get with our other Flexicore Closet Augers. Look at the illustration of our Double Spring Flexicore cable, and you'll see why it's tough enough to guarantee: over a 42 strand wire rope center, we coil not one but two layers of spring wire. This exclusive General design gives tremendous resistance to kinking without sacrificing flexibility.

DOWN HEAD

Gets around sharp bends easier. Protects bowl from chipping or breaking.
Patent No. 2,779,041.

There are three more feet of cable stored in the guide tube. (See cut-away.) When you need it, just press the button, draw back on the crank handle, and out slides the three extra feet you need.

T6FL-DH Down Head 5 3/4 lbs.
T6FL Standard Head 5 3/4 lbs.
