Wet & Dry Pressure Test Kit

THE PROFESSIONAL PLUMBERS WATER PRESSURE TEST KIT

'The H2&O Wet & Dry Test Kit has been designed to offer the professional plumber & installer the equipment to pressure test most common applications with it's selection of connectors and gauges'

Pressures of up to 25 bar can be read from the Gauges with an accuracy of +/- 2.5%. This is protected with a high absorbing rubber boot cover. Additionally a peak reading needle allows for readings to be taken when the gauge is left unattended

Connections to copper or plastic tube (15mm & 22mm) or thread (1/2"bsp & 3/4"bsp) can be made with the selection of adaptors

A 10 bar flexible hose also allows for testing in confined or restricted areas

System filling can be achieved with the aid of the 1/4" tee piece

NOTE

AS WITH ANY PRESSURISED SYSTEM DUE CARE SHOULD BE TAKEN WITH CONNECTIONS AND FASTENINGS

UNDER NO CIRCUMSTANCES SHOULD ANY PIECE OF EQUIPMENT BE USED IF IT IS SUSPECTED OF BEING FAULTY AND SHOULD BE RETURNED FROM WHERE THE KIT WAS PURCHASED

WHEN CONNECTING TO TUBE (COPPER OR PLASTIC), ENSURE THAT IT HAS BEEN CUT WITH THE APPROPRIATE CUTTER AND NOT A HACKSAW. ROUGH ENDED TUBING WILL DAMAGE THE SEALS IN THE PUSH FITTINGS
