PROFESSIONAL STRENGTH

**DRAIN
& TRAP
DEODORIZER**

Drain & Trap Deodorizer is a safe, easy to use product which eliminates noxious odors from floor drains, traps and bar drains.

Drain & Trap Deodorizer is not a masking agent or perfume.

DIRECTIONS:

Dissolve 1 to 2 ounces (29 - 58 g) of the powder in a gallon (3.78 liters) of water and pour into the drain. This solution effervesces gently, releasing oxygen which chemically neutralizes odors without leaving a heavy perfume.

For Mops: Add 1 ounce (29 g) per gallon (3.78 liters) of warm water in the bucket. Place mop in bucket and soak for 2-3 hours to clean and deodorize the mop.

Mop Buckets: Add 1-2 ounces (29 - 58 g) to standing water to eliminate odors.

Drain & Trap Deodorizer is cost effective; the bottle supplies enough chemical for up to 50 treatments and can be used as often as necessary, although daily use is recommended for troublesome drains.

Store in cool, dry area. As with any chemical, do not mix with acids, caustics or chlorine chemicals.

Nonflammable

Caution: Harmful if taken internally.
