

PROFESSIONAL STRENGTH

Main Line Cleaner contains millions of specialized waste degrading bacteria that effectively reduce sewage build-up in main waste lines. **Main Line Cleaner** digests sewage solids, fats, grease, and paper in sewer lines, or septic systems.

Main Line Cleaner is a biological product which, when used regularly, will prevent the need to use more aggressive chemicals, or emergency plumbing services.

Main Line Cleaner is ideal for restaurants, hotels, school cafeterias and other large plumbing systems with a network of pipes.

DIRECTIONS:

Shake well before use. Pour into toilet, flush once, allow to work 6-8 hours before flushing again.

To Clear Sluggish Main Waste Line: Pour 8 ounces (1 cup/236 ml) down toilet and flush. Repeat each day for four consecutive days. (16 applications per bottle). Use two times a year, or as needed.

For Low-flow Toilets: Pour 8 ounces (1 cup/236 ml) down toilet and flush. Repeat each day for three consecutive days. (16 applications per bottle). Apply twice a year, or as needed.

Floor Drains: Pour 10-12 ounces (296-355 ml) down drain followed by two gallons (7.6 liters) of warm water. Use weekly, or as needed.

Septic Tank Use: Flush 4 ounces (1/2 cup/118 ml) down toilet nearest to the septic tank. Use weekly. (32 applications per bottle)

Nonflammable

Caution: Harmful if taken internally.

Keep out of reach of children
